Ayush Pahuja

Full-Stack Blockchain Developer | Aptos Fellow | Startup Enthusiast | Backend Specialist

New Delhi, Delhi, India

Summary

As a passionate full-stack blockchain developer and startup enthusiast, I specialize in creating innovative solutions and driving impactful projects. With a strong foundation in both backend and frontend development, I have contributed to various industries, bringing a blend of technical expertise and leadership.

In my role as an Aptos Fellow, I continuously expand my blockchain knowledge and skills, staying at the forefront of this rapidly evolving field. At Foodverse (OneRare), the world's first metaverse for the global food and beverage industry, I built and deployed servers using Google Cloud, focusing on achieving smooth and secure data transfers from APIs, which improved data transfer performance by 30%.

As a Full Stack Blockchain Developer at IndiGG, I developed service APIs and collaborated with the backend team, leading to a 25% increase in system efficiency. During my internship at ZyberNetix, I gained hands-on experience in blockchain and full-stack development, contributing to projects that enhanced transactional efficiency by 20%.

My tenure as Chief Operations Officer at Drink Beer Save Water involved managing content creators, coordinating with distributors, and overseeing daily operations, resulting in a 15% increase in operational efficiency. Additionally, my internship at Cisco as a Cyber Security Student allowed me to apply theoretical knowledge to practical projects, further enhancing my cybersecurity skills.

I thrive in remote and dynamic environments, always eager to take on new challenges and contribute to groundbreaking projects. Connect with me to collaborate on innovative projects, discuss the latest trends in blockchain, or explore new opportunities in technology!

Key Skills:

Full-Stack Development

Blockchain Development

Backend Development

API Development

Cybersecurity

Project Management

Team Leadership

Metrics and Achievements:

Improved data transfer performance by 30% at Foodverse.

Increased system efficiency by 25% at IndiGG.

Enhanced transactional efficiency by 20% at ZyberNetix.

Boosted operational efficiency by 15% at Drink Beer Save Water.

Let's connect and explore opportunities to innovate and lead in the world of blockchain and technology!

Experience

Iceshard Games

Full Stack Engineer

November 2024 - Present (1 year 8 months)

Architected and developed responsive web applications using React.js, Node.js, and Express.js serving 50K+ weekly active users. Built RESTful APIs and microservices with Node.js/Express integrated with MongoDB and PostgreSQL databases. Implemented real-time features using Socket.io and WebSocket connections, improving user engagement by 40%. Optimized application performance through code splitting, lazy loading, and database query optimization, reducing load times by 35%. Collaborated with cross-functional teams using Git, JIRA, and Agile methodologies to deliver features on time.

IceShard Games Pvt. Ltd.

Fullstack developer

February 2024 - Present (2 years 5 months)

Foodverse (OneRare)

6 months

Junior Back End Developer

February 2024 - June 2024 (5 months)

Dubai, United Arab Emirates

Foodverse is a blockchain food metaverse project featuring interactive play-to-win games. As a Backend Developer, I built and maintained game deployment servers using Google Cloud, ensuring smooth and secure data transfers from APIs to enhance the user experience.

Full Stack Engineer

January 2024 - June 2024 (6 months)

Developed blockchain-integrated web applications using React.js, Web3.js, and Ethereum smart contracts. Built admin dashboards with Next.js and TypeScript for monitoring transaction metrics and user analytics. Implemented authentication systems using JWT tokens and OAuth 2.0, ensuring secure user access. Optimized smart contract interactions, reducing transaction confirmation times by 25% through efficient gas usage. Deployed applications on AWS EC2 and Vercel with CI/CD pipelines using GitHub Actions.

IndiGG

Full Stack blockchain developer

April 2023 - December 2023 (9 months)

Bengaluru, Karnataka, India

At Indi.gg, I collaborated with the backend team to build service APIs, leveraging AWS for scalable infrastructure. My role involved ensuring efficient communication between frontend and backend systems and maintaining robust, secure API endpoints.

ZyberNetix

Blockchain Development intern

February 2023 - April 2023 (3 months)

Noida, Uttar Pradesh, India

Drink Beer Save Water

Chief Operations Officer

November 2021 - January 2023 (1 year 3 months)

India

As Chief operations officer at dbsw my work includes managing all the content creators and being up to date with our network of distributors.

I also manage the interns and make sure all the operations are completed at the end of the day

Cisco

Cyber Security Student

January 2020 - March 2020 (3 months)

India

My work as an intern there was to work closely with the mentors and to apply all the modules they taught me in the project.

Education

Netaji Subhas University of Technology, East Campus

Bachelor of Technology - BTech, Electrical, Electronic and Communications

Engineering Technology/Technician · (March 2019 - July 2023)

NSUT West Campus Training and Placements

Bachelor of Technology, Electrical, Electronics and Communications

Engineering
